

I'm elated with the new proposal of 5.2Mcs and 136Kcs bands for Amateur use. I'd prefer General, Advanced & Extra allocated for the use of and a power limit of no more than 600W PEP.

136Kcs will be a challenge in aerial design for me, as I use nothing but wire for HF. Hope we may be granted the 2 new bands sooner than 2 or 3 years.

5.2Mcs was I believe a very wise choice between the 80m and 40m bands.

Ray Yakesh, W7SNS.
